Dear students,

Every child has the right to achieve basic foundational skill to be able to write, solve basic mathematical operations, and read with comprehension. Achieving these skills is crucial for a child's academic success and personal growth.

With this vision, Mission Buniyaad aims to aid the learning requirements of learners from class III to VIII. The Mission targets the learning gaps and conducts classes to eliminate these gaps amongst our students. Our aim is to ensure that each and every child sitting in our classroom is enabled and uplifted to be at the appropriate level of academic ability.

The previous session of Mission Buniyaad has shown phenomenal results, which is encouraging for us to take on more endeavours to improve the quality of education in our schools. In the academic year 2023 - 2024, Mission Buniyaad is continuing its efforts to provide better opportunities to promote skills and higher order thinking amongst students across all levels. This new academic year comes with new stories and flavours to make learning more fun for students. Making education more engaging and enjoyable to help students stay motivated, will surely pave the way for better academic outcomes.

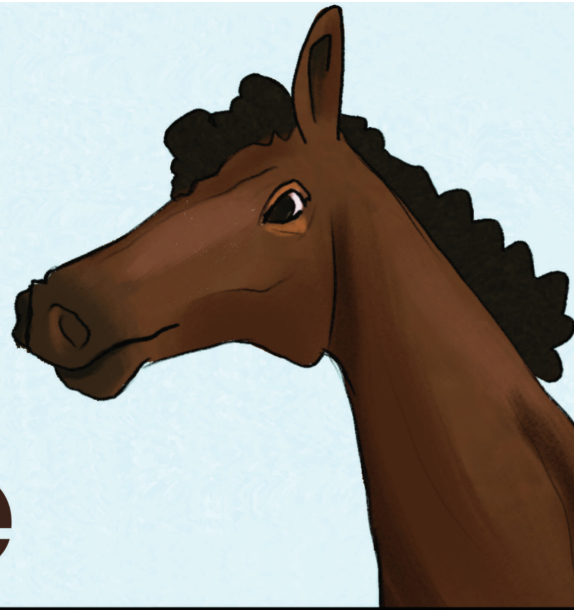

The objective of Mission Buniyaad is to develop Foundational Literacy and Numeracy skills in Hindi, Maths and English in a friendly environment where the learners are encouraged to think and reason critically, and express themselves creatively.

I hope that everyone benefits immensely from Mission Buniyaad, boldly climbing the steps of their ongoing academic journey to become independent thinkers and learners of India.

Best wishes,

Atishi
Education Minister, Delhi Government
